

medicaltracker

For MAT Operations

Chief Operating Officer

Decision-maker.

One infrastructure. Every school. A business case you can defend at board level.

You already know what it costs to pull health and safety data from thirteen different schools to answer a single board question.

You know the political difficulty of asking headteachers to give up tools they personally chose.

And you know that most suppliers pitch to schools and leave you to construct the trust-level case yourself.

We work with COOs and operations directors to build the standardisation model, the implementation plan, and the integration roadmap.

Trust-level Overview

Tailored implementation and rollout

MAT reference subscribers

97% annual renewal rate

Now integrating with CPOMS! One integration. Zero duplication.

medicaltracker

For MAT Operations

The business case, pre-built

Cost model	Single trust-wide agreement. Per-school pricing that scales.
Implementation	Bespoke rollout with dedicated onboarding support. We work to your timeline, not ours — pilot cohort first if preferred.
Standardisation	One process, one audit trail across the entire estate. Variance between your strongest and weakest schools becomes manageable.
Reporting	Our [NEW] Trust Overview from day one. Pull any medical metric across all schools without chasing individual data returns.
Risk reduction	Full DfE and HSE compliance built in. Medication audit trail, RIDDOR recording, and SEND care plans.

medicaltracker

For first-aiders, office staff, and DSLs.

You shouldn't have to choose between caring for a child and getting the paperwork right. With Medical Tracker, you don't.

A day with Medical Tracker

08:45 A new starter arrives. Their personal details are already in the system, visible to every member of staff who needs to see them, instantly.

10:15 A child needs their lunchtime medication. One tap logs the administration, the time, and the dose, no more relying on memory.

12:30 A fall in the playground. The incident is logged in under a minute, parents are notified with customisable preferences, and nothing gets forgotten by home time.

15:20 A parent asks what happened. You already have the answer, timestamped, accurate, and ready to share.

What you get

Care plans, instantly

Every child's health needs, allergies, and emergency protocols, searchable in seconds.

Specialist medication logging

Record every administration to a clinical-grade accuracy to ensure specialist care logging for every need.

Parent communication

Customisable updates to parents/carers after an incident; one less phone call for you to make.

Stock and expiry alerts

Know before an EpiPen or inhaler expires. No more discovering a gap in supply at the worst possible moment.
