For Trust Health and Safety Leads

Trust Health and Safety Lead

The specialist.

You already know which schools have gaps.

You're the person who gets called when there's a serious incident.

You're the one who has to say whether the system held up, whether the record was there, whether the care plan was followed, and whether the school did what it was supposed to do.

You also know the blind spots. The schools that are paper-light and assumption-heavy. The medication administrations that aren't being logged. The conditions that are on a form somewhere but haven't reached the right member of staff.

Medical Tracker gives you the trust-level pattern recognition, audit-trail integrity, and clinical depth that your current toolset almost certainly doesn't.

Full IHCP management

RIDDOR and near misses

Pattern analysis

Now integrating with CPOMS! One integration. Zero duplication.

medicaltracker

For Trust Health and Safety Leads

You're the person whose recommendation carries the most weight in this decision. We'd like to show you why the trusts you'd respect have already made it.

Built for the depth you need

IHCP Management

Structured, stored, and surfaced to the right staff with version control and approval alerts to parents/carers.

Medication tracking

Every administration logged, timestamped, and tied to a care plan.

RIDDOR and near misses

Statutory incident recording built in. Near misses captured before they become reportable and analysis.

Department
for Education

Benedict's Law

Allergy awareness

Allergen profiles, emergency protocols, and staff alerts. Every child's risk visible to every relevant member of staff.

Trust-level reporting

Condition prevalence, incident trends, medication volumes; aggregated across all schools and exportable.

SEND health support

Complex needs profiled and managed at the individual level. Conditions, interventions, and reviews in one structured record.

medicaltracker

For first-aiders, office staff, and DSLs.

You shouldn't have to choose between caring for a child and getting the paperwork right. With Medical Tracker, you don't.

A day with Medical Tracker

08:45 A new starter arrives. Their personal details are already in the system, visible to every member of staff who needs to see them, instantly.

10:15 A child needs their lunchtime medication. One tap logs the administration, the time, and the dose, no more relying on memory.

12:30 A fall in the playground. The incident is logged in under a minute, parents are notified with customisable preferences, and nothing gets forgotten by home time.

15:20 A parent asks what happened. You already have the answer, timestamped, accurate, and ready to share.

What you get

Care plans, instantly

Every child's health needs, allergies, and emergency protocols, searchable in seconds.

Specialist medication logging

Record every administration to a clinical-grade accuracy to ensure specialist care logging for every need.

Parent communication

Customisable updates to parents/carers after an incident; one less phone call for you to make.

Stock and expiry alerts

Know before an EpiPen or inhaler expires. No more discovering a gap in supply at the worst possible moment.
