

medicaltracker

For MAT Leaders

Chief Executive Officer

Stewardship.

The Trust that fails a child on health doesn't get a second chance to explain itself.

You can't be expected to be in the room when a child has a medical emergency.

You can't be expected to administer the medication, read the care plan, or make the call. But you will be accountable if something goes wrong and the system wasn't there to support the people who were.

Medical Tracker is the platform that 125+ Multi-Academy Trusts have adopted to ensure consistent, auditable, defensible health management across every school in their group.

Not because it was the cheapest option. Because it was the one they could stand behind at a board meeting, an Ofsted inspection or a parent/carer meeting.

4,000+ schools

180+ MATs

97% annual renewal rate

Now integrating with CPOMS! One integration. Zero duplication.

For MAT Leaders

medicaltracker

Your team will build the business case. Your Health and Safety lead will validate the functionality. Our job is to make sure you know the right decision was made, and to be able to prove it.

What Trust leaders say

“ Medical Tracker has streamlined our processes, improved accountability, and strengthened our health and safety framework.

Gary Smart, Trust Head of Capital & Compliance, 2025

What this means for your Trust

- ✓ **Board-ready reporting.** Trust-wide health data aggregated and reportable so governors can see consistent governance.
- ✓ **Ofsted defensibility.** Every incident, medication, and care plan carries a timestamped audit trail. When inspectors ask how health is managed, the answer is already documented.
- ✓ **No school is the weakest link.** Standardised across every school in the trust, no school can fall below the standard you've set.
- ✓ **The platform 180+ MATs have already chosen.** Including trusts of comparable size and complexity.
